

Advanced Sculpted Threads

Date & Time: Tuesday, June 22nd and 29th, 6 – 9 pm

Class Fee: \$30 Book: Sculpted Thread \$18.95

Supplies:

Equipment	Sewing machine – clean and in excellent working condition, with needle down capability.
	*Darning foot (#9). Note: The quilting foot (#29) and the Stitch Regulator are too large for the projects we will be doing and should not be used.
	*Bobbins – pre-wound as directed below.
	Thread stand.
	Small brush to clean lint.
	Eye protection – eye glasses or safety glasses. This is a must.
	Thread snippers.
Supplies	*Titanium top stitch 90/14 needles.
	*Badge Master - heavy weight dissolvable stabilizer.
	Ultra Fine Point Sharpie in at least two colors OR Pilot Precise V5 pens. (I like the multi-pak with 7 colors.)
Required Thread	*Lint free polyester such as Isacord or Bottomlin. No cotton or cotton-wrapped threads. You will need 800 yards each of a solid color and a variegated thread.
Additional Threads	You may bring additional colors and specialty threads if desired.
Book	*Sculpted Threads – Janet Shipley Hawks
Optional	Mary Ellen’s Best Press – Clear Starch Alternative
	Black Latch bobbin case for specialty threads.
	Small screwdriver to adjust bobbin tension.

Before Coming to Class:

- Clean the lint from your machine and oil it if necessary. **A clean machine is a must for this class.**
- Wind 4 bobbins (no more than ¾ full) of your variegated thread. Do not over-wind your bobbins. This will cause you lots of trouble.
- Wind bobbins with specialty threads you would like to use. Again, do not over-wind your bobbins.
- Put in a new top-stitch needle.

Project

- Shallow Vessel – page 40 in Sculpted Threads. This pattern uses only two threads – a solid and a variegated. You may use additional threads if you wish and know how to use them. The use of novelty and specialty threads will not be covered in this class.
- Various options for finishing edges will also be discussed.
